ProDataTool Data Analysis Made Easy

1. Dependable

Leverage on the ability of ProDataTool to process data of different sizes. You can process thousands to million of row based data for your analysis.

2. Organisation

Organise your data in different projects and access at the click of the button. ProDataTool is organised around different menus which makes your analysis easy to access and process

Statistics

Perform analysis using ProDataTool, with descriptive, Cross Tabulation, Pivot Analysis and more. ProDataTool allows you to analyse any number of records for further analysis whilst saving your tables separately.

Summarization

Summarize your data and identify different data patterns which are helpful for you to intepret and report on your data. With ProDataTool you can customize with the appropriate filters where it is required
